

Welcome to ATI Labs

Use this step-by-step guide to get started.

- 1 Login/Register:** Go to lab.atiaquaristik.com and sign in. For first time users, click [Register a new account](#) and complete the registration form. Save your login information for future testing.
- 2 Add Tank and RO Profiles:** For first time users only; Returning users with existing profiles, please skip ahead to step 3.
 - a. Click the [Add new tank](#) button and create a profile for your aquarium.
 - b. Click the [Add new tank](#) button again to create a second profile called "RODI Results."
- 3 Record Barcode:** Click the [Add new water analysis](#) button associated with your aquarium and enter the barcode from one of your test tubes. (All four test tubes have the same barcode.) Our lab will automatically add the results for your RODI water to your 'RODI Results' profile.
- 4 Fill Vials:**
 - a. Rinse the tube marked 'RO Water' with RO/RODI water and then fill with RO/RODI water and close tightly.
 - b. Rinse the remaining three test tubes in your aquarium water and then fill with aquarium water and close tightly.
- 5 Ship:**
 - a. Pack your samples back in the bubble mailer and seal.
 - b. Fill out the included return label with your return address.
 - c. Ship the test to our lab, using a service with an estimated delivery time of 2 weeks or less. ATI is not responsible for any shipping delays or tests that are lost in shipping transit. Please inquire with your carrier for expected delivery times.
